We respectfully request volunteers from any/all Hill AFB military members looking for a positive community service opportunity. This character will make appearances periodically throughout the base and local community when requested. It is a full-bodied costume, and the individual volunteer will always have an escort (wingman) from our office with them. After any event we would be happy to assist by providing a short bullet identifying the event and the community service involvement of the member for EPR, decoration or award purposes if requested.</p>

Opportunities include providing STEM related demonstrations, career presentations, robotics club mentoring and competition judging, rocket building and launching, science fair judging, and many others (Scientists and engineers do not need to use their own leave to volunteer).</p>

<p><b>STARBASE HILL</b></p> <p>Primary POC: David Amparan  Phone: 801-526-7494/7493  Location: Bldg 460</p>	<p>Would you want to build a CO2 Dragster, code a robot through a challenging obstacle course, or work with students in a STEM project? Well, we have the opportunity for you! STARBASE Hill continually looks for mentors to join and guide our communities' 6th and 7th grade students who participate in our exciting hands-on, mind-on program. We look to educate and enthuse these students to increase participation in future STEM opportunities and careers. As a mentor, you will advise the 6th graders in engineering and manufacturing a CO2 dragster using computer-aided design (CAD) software and actual tools in the hopes they produce a race winner! If you choose to work with the 7th graders, you will accompany the students into our Sphero Olympics where you will usher them through activities encompassing coding, genetics, evolution, and physics! Both these opportunities build the STEM professionals and leaders of tomorrow! If interested, don't hesitate, contact us today!</p>
